

## **Sky Hunters Environmental Education**

### **Environmental Biology The Nature of Things**

Set in a storytelling mode, here is a peek into a day in the life of a hawk and an owl. Looking at a 24-hour period we discuss how a diurnal hawk or falcon uses the same environment as a nocturnal owl. Discussion includes pair bonding, nesting, raising young, shared habitat needs, dispersal, and prey base needs. Designed to develop awareness of similarities between wild animals and humans.

**Audience: Younger children and families**

**California Science Content Standards for grades K-3**
